

Day 1 Arrive Tri An – Jungle Biking – Science Challenge

Upon arrival at Tri An, Dong Nai we check in and enjoy a home-made lunch.

Early afternoon we hop on our bikes and begin cycling through the majestic Ma Da Forest. Our trail will take us off road and across streams before being rewarded with a beautiful sunset on Tri Lake.

This evening after dinner, we split into teams to work together on our simple science challenge. We will be provided with a variety of items such as straws, string, tape, rope and rubber bands etc and will be required to design and build a structure which an egg can land on from a height without cracking!

Day 2 Outdoor Survival Lesson – Survival Game – Campfire

After breakfast, we partake in an outdoor survival lesson. Breaking into groups, team members will be required to work together to erect a shelter using sticks and palm leaves, learn how to tie the 5 most useful knots for camping, start a fire without matches and practice safety habits whilst in the outdoors.

Early afternoon, we split into teams to begin our “Jungle Survival” game. We will be provided with instructions, clues and challenges. As we make our way through the clues, we will be presented with parts of our survival pack which we will need to make a shelter and tonight’s dinner. Along the way there are bonus prizes such as snack bags and extra marshmallows for tonight’s campfire which are able to be collected by completing additional challenges.

This evening we relax around a campfire whilst enjoying roasted marshmallows.

Day 3 Archery – Obstacle Course – Depart

This morning we enjoy a short-range archery session. We will learn the basics of how to shoot an arrow whilst playing fun games to improve accuracy. Next, we enjoy an obstacle course where we will use our newfound archery skills as well as overcome various physical challenges in order to complete the race.

Early afternoon we farewell our hosts and make our way home.
